Service Areas

Peak Enterprise Solutions is a management consulting firm dedicated to supporting small to mid-market companies through the use of proven methodologies. Practice areas include:

Lean Enterprise Performance

ERP and Supply Chain Management

Business System Selection, Design and Implementation

Organizational Leadership Development

Workforce Education and Training

Peak Enterprise Solutions is unique in that it offers consulting services that combine Lean Enterprise Thinking, ERP / Supply Chain Management Principles and Work Force Training and Education into one practice with the experience needed to make it happen.

Due to our partnership with the Apprentice Academy of South Bend and Vincennes University, much of our education program qualifies for college credit and state governmental grants.

Improving the Value of Our Client Organizations

Experience Working for You

A successful project implementation depends on two key factors: a proven methodology to follow and experienced hands-on business consultants. The right team working together will assure that all project goals are achieved.

By using a proven methodology to approaching projects and a comprehensive set of educational materials, Peak is able to combine the experience and best practice knowledge of the consultant with the industry and company knowledge of the client in order to develop and implement solutions that work.

Peak sells no software and represents no specific system so that the consultants can be objective in working with specific solutions. By listening, interacting and making suggestions, Peak consultants will help realize positive Return on Investment expectations. During the project and after the go-live effort, they will provide guidance to ensure a successful and sustainable change is accomplished.

By focusing on all of the business processes involved, Peak is able to help transform the business to the desired future state of improved performance.
